2) Starting from one side at a time, place a fiber glass rod joint (1) in each opening between the sleeves along the side.

3) Insert one "A-1" rod with the end without the metal coupling into the canopy sleeve first. The end of the rod with the metal coupling shall be facing you.

4) Continue inserting 3 more "A-1" rods through the canopy sleeve making sure the "A-1" rods are inserted into the metal coupling and through the fiber glass rod joint (1).

5) Slide one "A-2" rod into the sleeve making sure it's inserted into the last "A-1" rod metal coupling.

Note: Each side shall have 4 "A-1" rods and one "A-2" rod, and the rods shall be inserted through all the fiber glass rod joints (1).

6) Repeat above steps 2 to 5 with the other side of the canopy sleeves.
7) Make sure the rods are inserted through all the fiber glass rod joints (1).

Maintenance and long term storage

1. Regularly check all components for sign of damage and straining. Replace damaged components immediately.
2. Two people are needed for disassembly. Remove the canopy assembly from the frame pool. **CAUTION:** When disassembling, hold the rod firmly when disconnecting the rod from the mounting clamp in order to prevent face or bodily injury.
3. Use a sponge and clean water to wipe away any soil or stains on the canopy.
4. Reverse the above setup instructions (see Fig. 4), and make sure all components are completely dry before storage.
5. Store the canopy and accessories in a dry, temperature controlled, between 0º – 40ºC (32º – 104ºF), storage location.
6. The original packing can be used for storage.
